

# TASK MANAGEMENT SYSTEM

N. HIMAVATH

The screenshot shows a task management application interface. At the top, there's a navigation bar with links like Summary, Timeline, Backlog (which is underlined), Active sprints, Calendar, Reports, List, Forms, All work, Components, More, and a plus sign for creating new items. Below the navigation is a search bar and filter options for Version, Epic, Label, and Quick filters, along with a Clear filters button.

The main area has a purple header with the text "Plan your sprint" and a sub-instruction: "Drag work items from the Backlog section or create new ones to plan the work for this sprint. Select Start sprint when you're ready." There's also a "Create" button.

Below this, a section titled "Backlog (2 of 4 work items visible)" lists two items:

- TMS-2 Task Creation and Assignment
- TMS-4 Progress Tracking and Reporting

For each item, there are status indicators (0 TO DO, 0 IN PROGRESS, 0 QA, 0 PENDING REVIEW) and a "Create sprint" button. The bottom right corner of the backlog section shows a progress bar with three colored segments (blue, green, yellow).
